- Breast Care Nursing / Coordination

- Ghana
- Leadership
- Collaboration
- Sturcture
- Execution Committee
- Consultants

Issue 1:	How will patients and carers without access to private transport be assisted to get to One Stop Doctors
Issue 2:	How will the new services provided at the unit fit with breast services offered by other providers eg; Spire Bushey, Spire Harpenden , St Albans City Hospital, Clementine Churchill Hospital
Issue 3:	Will consolidating all breast outpatients services on the same site is better than having multiple feeder sites in interest of ease of access, reducing waiting times, and reducing cost for the patient
Issue 4:	How can we create a future proof model of delivering breast care service : Team Approach, Multisite Approach, Virtual Discussions, E Communication, Collaboration with Centres of Excellence

- Clear analysis of work load
- Outpatient contact in : Spire Group
- : BMI Group
- : Local NHS

- Cancer Work Load : Spire Group
- : BMI Group
- : Local NHS

- Screening Work Load
